

SIMEGA

Welcome to

“Simple Ideas, Mega Possibilities”

At **SIMEGA**, we're more than just a corporate gift provider; we're a partner in creativity, offering end-to-end solutions that bring your gifting ideas to life. With our one-stop service, we take you from initial concept design all the way through to production, ensuring that every corporate gift is tailored to your exact needs and brand identity.

Our slogan, "Simple Ideas, Mega Possibilities" reflects our commitment to transforming even the simplest concepts into extraordinary products. We help businesses expand their reach, strengthen relationships, and create lasting impressions through innovative, high-quality corporate gifts.

From Concept to Creation

Our process starts with your concept ideas—whether it's a simple logo placement or a completely custom design—and we help bring your vision to life. With our design services and the ability to produce unique gifts tailored to your specifications, we give your business a competitive edge through memorable corporate gifting.

With offices in Hong Kong and China, we manage the entire design, development and production process, ensuring that every product meets the highest standards of quality and craftsmanship. From the initial sketch to final production, our team oversees each step to guarantee the perfect outcome.

DESIGN • MANUFACTURE • DELIVER

We're not just a corporate gift supplier—we're your partner in creativity and innovation. We provide a one-stop solution for all your corporate gifting needs, guiding you through every step from concept design to finished product.

OUR PRODUCTS

SIMEGA offer an extensive product range that covers a variety of categories, each designed to meet the needs of modern businesses. Whether you're looking for something classic or something completely unique, we have the perfect gift for every occasion.

WHY SIMEGA

At **SIMEGA**, we turn your gifting ideas into something extraordinary. Whether you're looking for a standout corporate gift or a custom design to reflect your brand, we are here to bring your vision to life.

We're dedicated to delivering **more than just gifts!** We create memorable experiences that help you strengthen your brand, expand your reach, and build lasting relationships with your clients, employees, and partners.

We are offering **3** design collections which cover the latest cooperate gift market needs.

 **SIMEGA**

HYDRATION

Collection

At SIMEGA we believe in "Simple Ideas, Mega Possibilities." Our drinkware collection is the perfect embodiment of this philosophy, offering maximum flexibility with a wide range of customisable options to meet every need in hydration purpose. Whether for personal use or for your customers, this collection allows you to create the ideal drinkware solution tailored to specific preferences by our special designed Lid and Body.

 **SIMEGA**

RECHARGE

Collection

The Recharge collection isn't just another electronic product—it's a collection of accessories designed to enhance the experience of using electronics. Our main focus is to optimize the storage of various charging cables, ensuring a tidy and efficient solution. Beyond just organization, Recharge also serves as a branding platform, allowing businesses to showcase their logos and messages in a meaningful way—seamlessly integrating function with brand.

 **SIMEGA**

GADGETS

Collection

Just like SIMEGA's philosophy, this series aims to elevate everyday essentials through simple yet innovative concepts. It is not limited to any specific product category—as long as there is a need, we will provide tailored design solutions to enhance daily life and make every experience better and more seamless.

Customisable Drinkware Collection

This customisable system empowers you to easily meet the diverse needs of your customers without maintaining an overwhelming stock of individual products. By stocking just the interchangeable parts (lids, bodies, and accessories), you can quickly assemble a range of finished products on demand, offering maximum variety with minimal inventory. This flexible approach reduces stock management cost, lowers risk, and ensures your assortments are always in tune with customer demands.

With endless combinations at your fingertips, our customizable drinkware collection is designed to deliver both practicality and style, making it the perfect solution for any hydration need.

Over 700+
Possibilities

DUAL SEALS DESIGN

Our expertly designed lids are equipped with two silicone seals for superior security and leak-proof performance, ensuring a tight closure that keeps your drinks safe and contained. The Dual seals design offer enhanced protection, preventing leaks and spills, even during movement or accidental knocks.

DURABLE AND LONG LASTING

304 stainless steel is extremely robust and resists knocks and scratches, ensuring long-term use and an attractive appearance. It is also easy to clean and dishwasher safe. The combination of double-walled insulation and an inner copper layer minimizes thermal conductivity, resulting in exceptional retention times.

EASE TO CLEAN

The generously sized opening is designed with hygiene in mind, allowing users to effortlessly clean the bottle, even reaching the bottom by hand. Its smooth, seam-less surface further ensures a quick and thorough clean, making it ideal for those who value cleanliness.

EVERYDAY CARRY

This drinkware collection is crafted with a specially designed wider base for enhanced stability, even on uneven terrain, while maintaining compatibility with most car cup holders, take it anywhere with ease—designed for life on the go.

Dual-Flip Lid

Designed for convenience, this lid features two flip open—one for sipping and one for a straw. The water wave-inspired flips add a sleek touch, while built-in stoppers keep them securely open while drinking. Its leak-resistant seal ensures a mess-free experience, making it perfect for on-the-go use. Made from BPA-free, durable materials, it's easy to clean and built to last. Elevate your tumbler with this functional and stylish dual-flip lid!

DRINKING BOTTLE

Know
me
more
from
our
website

The simple and straight forward design stays true to the traditional water bottle concept. The transparent lid, inspired by the rippling effect of water droplets, adds a touch of elegance. The small drinking spout caters to different users, while the fully removable lid allows for easy cleaning, ensuring the bottle stays hygienic. The clear lid also enables users to see the liquid level inside at a glance.

A special designed groove ensures that any excess water after drinking temporarily collects in the channel rather than dripping onto the bottle body, helping to keep it dry and clean at all times.

website

This specially designed bottle lid is perfect for outdoor activities, featuring double-wall insulation that effectively retains heat for an extended period. The integrated protective cap enhances insulation, while the internal strainer is ideal for holding ice cubes or fruit-infused beverages. It helps filter out large particles when pouring, ensuring a smoother drinking experience.

The hidden carry handle on the lid provides convenience for on-the-go use, and its streamlined design allows for multiple carrying options even with one finger. Additionally, a lanyard hole at the back of the lid enables compatibility with carabiners and straps, making it adaptable to different outdoor settings for effortless carrying.

Designed for active individuals, this water bottle features a foldable straw lid for effortless drinking and enhanced hygiene. The adjustable stainless steel handle allows for different holding angles and easy storage. Its rugged exterior highlights the product's durability. The leak-proof foldable straw creates a secure seal when closed, preventing spills and maintaining hygiene. A protruding step beneath the straw allows for one-finger operation, enabling quick and effortless access for instant drinking. The rubber-coated stainless steel handle provides a sturdy and comfortable grip, enhancing the overall user experience. It also allows the bottle to be easily hung in various locations, making it more convenient for drinking and storage during sports and outdoor activities.

CARRY RING

Know
me
more
from
our
website

UNIQUE DESIGN CARRY RING

The uniquely designed portable loop is crafted to accommodate various types of straps, allowing users to customize their carrying experience based on their lifestyle needs. Whether for outdoor adventures, urban commuting, or everyday use, this versatile loop enhances convenience and portability. A pioneering feature of this design is the 90-degree split strap hole, which has been ergonomically engineered to ensure the bottle stays close to the body. This minimizes movement while walking or running, preventing unnecessary swinging and improving overall comfort.

Additionally, the loop is made from a specially blended material that offers both flexibility and durability. This unique composition allows the loop to form a snug fit around the bottle, ensuring it remains secure while also providing the necessary strength to support the weight of a fully filled bottle. This thoughtful combination of ergonomic design and high-performance materials makes the carrying experience seamless, reliable, and comfortable for users in any situation.

HOW TO ATTACH

The specially designed loop is exclusively made to be used with SIMEGA's uniquely shaped bottles, ensuring a seamless and secure attachment. To accommodate the loop, the bottle needs adding an additional fixed rib that serves as a structural guide, allowing for a precise and stable fit. This innovative design requires the loop to be assembled from the bottom up, ensuring that it locks into place effectively without slipping or detaching during use.

One of the key advantages of this system is its ease of attachment and removal. Unlike conventional loops that may be permanently affixed or difficult to clean, this design allows users to detach the loop effortlessly whenever needed. This feature enhances overall hygiene by making cleaning and maintenance much more convenient. Whether for daily use or long-term durability, the thoughtful engineering behind this design ensures that users can enjoy a reliable and practical carrying experience without compromising cleanliness or ease of use.

CUSTOMIZE YOUR BOTTLE

SIMEGA

HYDRATION

Collection

GETS

ROBUST

A special robust design style with additional strength enhancing pattern to keep your hydration tool more durable.

All sizes and Lids are available with this unique robust style.

To know more, please contact **SIMEGA** directly.

THE ROBUST DESIGN

The specially engineered reinforced rib design at the bottom significantly strengthens the structure, making your hydration tool far more resilient against dents, impacts, and wear. No more worrying about your bottle getting damaged from daily adventures or rugged use. All Hydration products can be upgraded to this robust design, dramatically enhancing their durability and longevity. The functional, textured pattern not only reinforces toughness but also adds a bold, distinctive look—because your water bottle should be as strong and unyielding as you are.

CABLE PARTNER

Know
me
more
from
our
website

Our cable ties will be the perfect companion for all your charging cables. The angular design is inspired by the futuristic feel of the electronic world, and the unique cable management method can perfectly accommodate USB cables of varying material, thickness and length. The aluminum plate on the lid allows for easy laser engraving, enabling clients to effectively display their messages and logos.

To hold your cable

Gently push the silicone strap forward to expand the middle section, creating enough space for the cable to pass through. Once the cable is positioned correctly, pull the strap back to its original position to tighten the grip and securely hold the cable in place.

To adjust the tightness

Start by flipping open the top case to access the silicone strap. Carefully fold the strap to your desired position, ensuring the fit is just right for your needs. Once the strap is properly positioned, gently flip the top case back down, pressing it firmly to lock everything securely in place.

from
our
website

Simplicity is Beauty—this philosophy is the foundation of the Tubier lighting series. Its minimalist design not only exudes a contemporary aesthetic but also enhances its market appeal. Beneath its simple exterior lies an advanced lighting structure, delivering a surprisingly refined user experience. The hidden handle can be easily opened with just one finger. Simply pull out the light tube, and it will automatically turn on. The handle also allows for easy hanging of the camping lantern in various locations. The touch-sensitive control on top enabling seamless adjustment of brightness, the light can also switch to a flashing red warning mode with a gentle tap. The base is equipped with three powerful built-in magnets, allowing the lantern to securely attach to different metal surfaces. Additionally, the USB-C charging design reinforces the concept of eco-friendliness, promoting a more sustainable way of living.

A SCREWDRIVER FOR MANUAL AND ELECTRONIC USE

This might be the world's smallest electric screwdriver! Designed with a hexagonal shape, it seamlessly blends with traditional hand tools. In manual mode, it delivers up to 3Nm of torque, making it ideal for simple, non-repetitive screw fastening and removal. When connected via USB-C, it provides a continuous 0.3Nm torque output, perfect for tedious and repetitive assembly or repair tasks. For added convenience, the front-end LED light ensures clear visibility, while the bidirectional rotation function allows for flexible operation.

EVERLAST SCREW DRIVER TOWER

Know
me
more
from
our
website

The screwdriver, a tool invented around 1580, has existed for over 400 years. While its design has undergone various optimizations over time, its core form has remained largely unchanged—making it a truly timeless design. The inspiration behind The Everlast stems from this rich history, with the aim of adding warmth to what is traditionally a cold, mechanical tool. By integrating the concept of preserved flowers with a toolset, this product becomes more than just a practical item—it transforms into a decorative piece that enhances home aesthetics. Additionally, the design challenges the traditionally masculine appearance of tools, creating a more gender-neutral aesthetic to appeal to a broader audience. The Everlast includes 30 different screwdriver bits, perfectly equipped to meet everyday needs.

SIMEGA

“We offer an extensive product range that covers a variety of categories, each designed to meet the needs of modern businesses. Whether you’re looking for something classic or something completely unique, we have the perfect gift for every occasion.”

The Founder Message

“I’m **Simpson** Cheng - the founder of SIMEGA Ltd. A highly skilled product designer with over 20 years of experience, specializing in transforming ideas into high-quality, world-class products. My Hong Kong and Australia educational background has equipped me with both a global design vision and a deep understanding of production processes. My time in Australia expanded my international perspective, while my studies at Hong Kong laid the groundwork for my expertise in production techniques and engineering fundamentals.

Throughout my career, I have gained invaluable hands-on experience working with factories in China, which has allowed me to develop a full understanding of modern production methods, engineering processes, and cost management. This experience has also enabled me to build an extensive network of suppliers and manufacturers, ensuring that I can deliver cost-effective, high-quality products. “Contact us today to start your custom gifting journey with **SIMEGA!**”

My passion for design drives SIMEGA to create innovative, functional solutions while maintaining a perfect balance between design aesthetics and production feasibility. With a proven track record, including multiple Red Dot Design Awards, I consistently exceed client expectations and bring designs to life that stand out in the global market. As a professional, I excel at managing product development from concept to completion. My expertise in design, engineering, and production allows me to guide clients through every stage of the process, ensuring seamless collaboration and timely delivery of top-quality products.
